Notes to Designers -All graphic files must be built at 150 dpi for 150dpi Output.

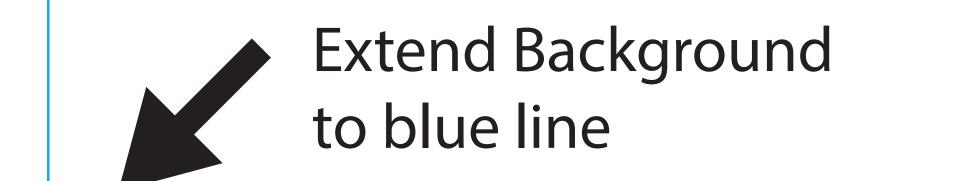

-All graphic files must be created using CMYK color mode to ensure the best color matching. If you would like a specific color matched, you MUST provide a PMS color or wee cannot guarantee color matching.

-It is best to **flatten all images** and outline all text to ensure that nothing will drop out or change during file transfer.

-Be aware of **Safe Viewable Area** and guides that may cut your graphic off. Using guildelines will keep margins on your radar and prevent mistakes.
